

## DEFINING TOMORROW'S STANDARDS

### Innovative Partnerships

We collaborate with industry-leading manufacturers to bring the latest solutions to the Middle East. Our partnerships provide access to advanced, reliable machinery that meets the highest standards in efficiency and durability.

### Portable Solutions

Our equipment selection is designed to minimise manual labour and accelerate project timelines. These solutions optimise workflows, helping teams increase productivity and meet project deadlines more efficiently.

### Commitment to Safety

Safety is central to our equipment selection. We work with trusted suppliers who prioritise robust safety features, ensuring that every machine contributes to safer work environments and meets strict safety standards.

### Sustainable Solutions

With a focus on sustainability, we offer products that reduce environmental impact and improve energy efficiency. Our eco-friendly solutions support sustainable practices across the Middle East, enhancing long-term project viability.

## 01 Integrating Artificial Intelligence in Core FM Operations

Ontegra, more than a facilities management company, is your expert in proactive asset care. With roots stretching back to 2002 and the backing of Deyaar, we possess a deep understanding of customer needs. Our approach transcends traditional FM services, as we employ global best practices to not only manage but also enhance and extend the life cycle of your assets. Our capabilities have earned us the trust of a diverse clientele, managing a substantial portfolio across various industries.

### Future-Ready FM Solutions Service Beyond Standards

Ontegra isn't just aligned with international service standards; we define them. Adhering to ISO 41001, 55001, 14001, and 18001, we're setting the benchmark for quality in FM.

SEE OUR STANDARD

### High Capacity

The Screena is capable of screening upto 60 tonnes of material per hour, maximizing efficiency.

### Portable Design

Equipped with run-flat tyres, the Screena can easily navigate rough terrain and be moved by a single operator.

### Eco-Friendly Power

Powered by a -3phase 0.55kw motor that runsoff a 110v or 240v supply, minimizing energy consumption while maintaining high throughput.

## Designed with Standards in Mind

Our products are crafted to exceed industry benchmarks, ensuring top-quality and reliability.
